PROCEEDINGS

OF THE

ROYAL SOCIETY OF LONDON

SERIES A

CONTAINING PAPERS OF A MATHEMATICAL AND PHYSICAL CHARACTER.

VOL. XCVIII.

LONDON:

PRINTED FOR THE ROYAL SOCIETY AND SOLD BY
HARRISON AND SONS, LTD., ST. MARTIN'S LANE,
PRINTERS IN ORDINARY TO HIS MAJESTY.

MARCH, 1921.

LONDON :
HARRISON AND SONS, LTD., PRINTERS IN ORDINARY TO HIS MAJESTY,
ST. MARTIN'S LANE.

CONTENTS.

SERIES A. VOL. XCVIII.

PAGE

Minutes of Meetings, January to December, 1920 ..... i–xvi

No. A 688.—September 1, 1920.

The Aspherical Nucleus Theory applied to the Balmer Series of Hydrogen. By L. Silberstein, Ph.D., Lecturer in Mathematical Physics at the University of Rome. Communicated by Prof. J. W. Nicholson, F.R.S. 1

The Catalytic Activity of Copper.—Part I. By W. G. Palmer, St. John's College, Cambridge. Communicated by Sir William Pope, F.R.S. 13

A Study of Catalytic Actions at Solid Surfaces. V.—The Rate of Change conditioned by a Nickel Catalyst and its Bearing on the Law of Mass Action. By E. F. Armstrong, D.Sc., F.R.S., and T. P. Hilditch, D.Sc. 27

The Origin of the "Cyanogen" Bands. By S. Barratt. Communicated by Prof. T. R. Merton, F.R.S. 40

Moving Striations in Neon and Helium. By F. W. Aston, M.A., D.Sc., and T. Kikuchi. Communicated by Prof. Sir E. Rutherford, F.R.S. 50

A Re-examination of the Light scattered by Gases in respect of Polarisation. II.—Experiments on Helium and Argon. By Lord Rayleigh, F.R.S., Professor of Physics, Imperial College of Science, South Kensington 57

Reduction of Error by Linear Compounding. By W. F. Sheppard, Sc.D., LL.M. Communicated by Prof. E. T. Whittaker, F.R.S. (Abstract.) 64

No. A 689.—October 1, 1920.

Monoclinic Double Selenates of the Copper Group. By A. E. H. Tutton, D.Sc., M.A., F.R.S. 67

Arc Spectra *in vacuo* and Spark Spectra in Helium of Various Elements. By J. C. McLennan, F.R.S., Professor of Physics, University of Toronto, J. F. T. Young, M.A., and H. J. C. Ireton, M.A. (Plate 1) 95

Spark Spectra of Various Elements in Helium in the Extreme Ultra-Violet. By J. C. McLennan, F.R.S., Professor of Physics, University of Toronto, and A. C. Lewis, M.A. (Plate 2, A.) 109

Note on Vacuum Grating Spectroscopy. By J. C. McLennan, F.R.S., Professor of Physics, University of Toronto. (Plate 2, B.) 114

The Effects of Electron Collisions with Atmospheric Neon. By Frank Horton, Sc.D., Professor of Physics in the University of London, and Ann Catherine Davies, M.Sc., Royal Holloway College, Englefield Green. Communicated by C. T. R. Wilson, F.R.S. 124

No. A 690.—November 3, 1920.

PAGE

The Absorption of Light by Elements in the State of Vapour: Selenium and Tellurium; Mercury, Zinc, Cadmium; Phosphorus, Arsenic, Antimony. By Sir J. J. Dobbie, F.R.S., and J. J. Fox, O.B.E., D.Sc. (Plates 3, 4, and 5)..... 147

Photochemical Investigations of the Photographic Plate. By R. E. Slade, D.Sc., F.I.C., and G. I. Higson, M.Sc., A.I.C. Communicated by Prof. J. N. Collie, F.R.S. (Plate 6) 154

Dilatation and Compressibility of Liquid Carbonic Acid. By C. F. Jenkin, C.B.E., M.Inst.C.E., Professor of Engineering Science, Oxford. Communicated by Sir J. Alfred Ewing, K.C.B., F.R.S..... 170

Radiation in Explosions of Hydrogen and Air. By W. T. David, M.A., D.Sc. Communicated by Prof. H. L. Callendar, F.R.S..... 183

The Aerodynamics of a Spinning Shell. By R. H. Fowler, E. G. Gallop, C. N. H. Lock, and H. W. Richmond, F.R.S. (Abstract) 199

On the Vibrations of an Elastic Plate in Contact with Water. By Horace Lamb, F.R.S. 205

No. A 691.—December 3, 1920.

The Transmission of Electric Waves around the Earth's Surface. By H. M. Macdonald, F.R.S. 216

Forces in Surface Films. Part I.—Theoretical Considerations. Part II.—Experimental Observations and Calculations. Part III.—The Charge on Colloids. By A. M. Williams, M.A., D.Sc., Chemistry Department, University of Edinburgh. Communicated by Prof. James Walker, F.R.S. 223

The Relationship between Pressure and Temperature at the Same Level in the Free Atmosphere. By E. H. Chapman, M.A., D.Sc. Communicated by Sir Napier Shaw, F.R.S. 235

On the Absorption and Scattering of Light. By Sir Arthur Schuster, F.R.S. 248

On the Effect of Concentration on the Spectra of Luminous Gases. By T. R. Merton, M.A., D.Sc., F.R.S., Professor of Spectroscopy in the University of Oxford 255

On the Effect of Asymmetry on Wave-length Determinations. By J. W. Nicholson, F.R.S., and T. R. Merton, F.R.S. 261

No. A. 692.—January 3, 1921.

Magnetism and Atomic Structure.—I. By A. E. Oxley, M.A., D.Sc., F.Inst.P., Mackinnon Student of the Royal Society. Communicated by Prof. S. Chapman, F.R.S. 264

On the Measurement of Low Magnetic Susceptibility by an Instrument of New Type. By Ernest Wilson, M.Inst.C.E., M.Inst.E.E. Communicated by Prof. J. W. Nicholson, F.R.S. 274

Double Refraction and Crystalline Structure of Silica Glass. By Lord Rayleigh, F.R.S., Professor of Physics, Imperial College, South Kensington. (Plates 7-9) 284

PAGE

The Magnetic Mechanical Analysis of Manganese Steel. By Sir Robert Hadfield, F.R.S., and Messrs. S. R. Williams and I. S. Bowen, of the Department of Physics, Oberlin College, Oberlin, Ohio, U.S.A. 297

The Internal Energy of Inflammable Mixtures of Coal-gas and Air after Explosion. By W. T. David, M.A., D.Sc., Professor of Engineering, University College of South Wales and Monmouthshire. Communicated by Sir Dugald Clerk, F.R.S. 303

Address of the President, Sir J. J. Thomson, O.M., at the Anniversary Meeting, November 30, 1920 319

No. A 693.—February 2, 1921.

The Tidal Motion in the Irish Sea, its Currents and its Energy. By R. O. Street, M.A., M.Sc., Fellow of St. John's College, Cambridge, and Lecturer in the University of Liverpool. Communicated by Sir Joseph Larmor, F.R.S. 329

Electrification of an Insulated Lens, treated by the Stream-force-function ; and Allied Problems. By Sir G. Greenhill, F.R.S. 345

On the Proximity of Atoms in Gaseous Molecules. By A. O. Rankine, D.Sc., Professor of Physics in the Imperial College of Science and Technology. Communicated by Prof. H. L. Callendar, F.R.S. 360

On the Similarity between Carbon Dioxide and Nitrous Oxide. By A. O. Rankine, D.Sc., Professor of Physics in the Imperial College of Science and Technology. Communicated by Prof. H. L. Callendar, F.R.S. 369

Experiments on Electron Emission from Hot Bodies. By Sih Ling Ting, M.Sc., Birmingham. Communicated, with a Preface, by Prof. O. W. Richardson, F.R.S. 374

No. A 694.—March 3, 1921.

The Ultramicroscopic Structure of Soaps. By W. F. Darke, J. W. McBain, and C. S. Salmon. Communicated by W. B. Hardy, Sec. R.S. (Plates 10 and 11) 395

The Transmission of Electric Waves around the Earth's Surface. By H. M. Macdonald, F.R.S. 409

A Comparison of Magnetic Declination Changes at British Observatories. By C. Chree, Sc.D., LL.D., F.R.S. 411

Siren Harmonics and a Pure Tone Siren. By E. A. Milne and R. H. Fowler. Communicated by Prof. A. V. Hill, F.R.S. 414

The Stability of Fluid Motion. By T. H. Havelock, F.R.S. 428

No. A. 695.—March 24, 1921.

Obituary Notices of Fellows Deceased :—

John William Strutt, Baron Rayleigh (with portrait) i

Emil Fischer (with portrait) 1
